To FreeRider Authorized Distributors:

Beware of Non-genuine parts

Luggie genuine power charger is specific designed for Luggie Lithium-Ion battery. Some non-genuine and third party power chargers and batteries may not be designed properly and could result in safety issues. Also non-genuine charger may have compromised battery capacity and may fail to work correctly. Use only the supplied battery charger and no other charging equipment.

For those battery quality claims but using non-genuine charger, that would be excluded from manufacturer warranty. From now on, we manufacturer will require the battery claim report should come with the serial number of genuine power charger. If the end user can't provide above information, the battery warranty may be recognized as invalid.
